

Troy,

Competing in the fast food game for over 20 years is not an easy journey. And to be able to compete on a national basis with larger multinational chains, every element of our business demands special attention. Whilst we thought we had our insurance in order, Lea, within 2 hours of discussion presented creative methods to cover our businesses in which we and others would never have thought possible. Lea covered our Head Quarters, our production arm and our franchisee's businesses systematically, with attention to detail and with better pricing. Our experience and relationship with Lea management and its staff members is one of professionalism and at times a little fun along the way. If you are seeking insurance cover, we highly recommend Lea.

Regards
